

GYMROLLER

New patented fitness tool and concept

www.gymroller.com

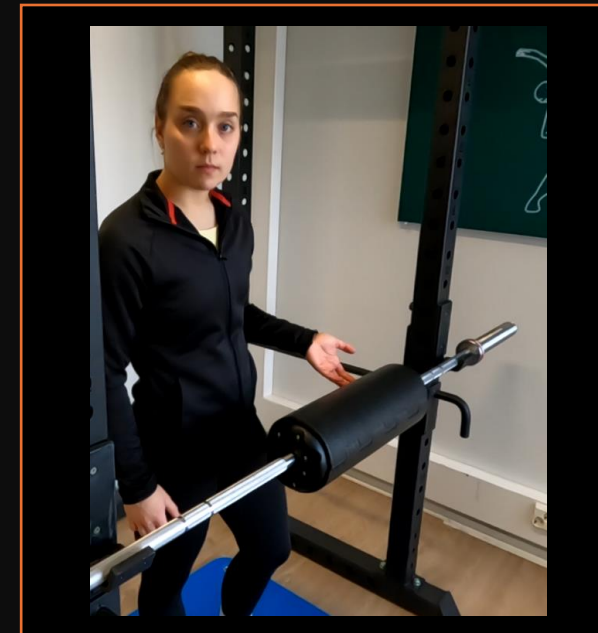

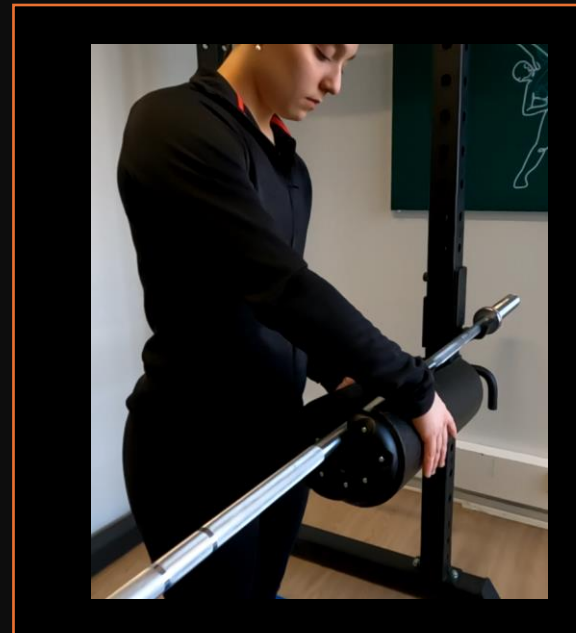

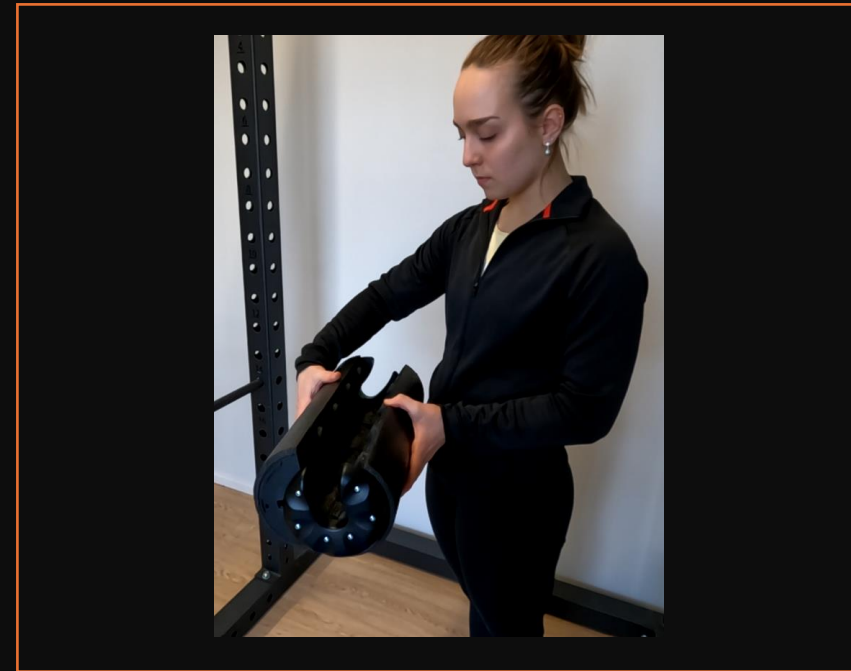

What

- A new fitness/health product designed for use in gyms, CrossFit facilities, Pilates/yoga studios, and small group training sessions, among others.
- It serves as an additional, affordable tool that expands the range of exercises previously performed using existing gym equipment.
- Gymroller is a roller that can be opened, attached, adjusted, and locked onto any bar, such as a barbell or rack safety bars found in gyms.
- It adds extra features to traditional gym, CrossFit, and Pilates exercises, offering increased variation, scalability, and assistance.
- A novel fitness concept tailored for small group training sessions.

Function

1. Open Gymroller
2. Insert over any bar
3. Close and lock
4. Adjust the sliding joints to firmly and comfortable fit over different diameter bars
5. Perform variety of exercises

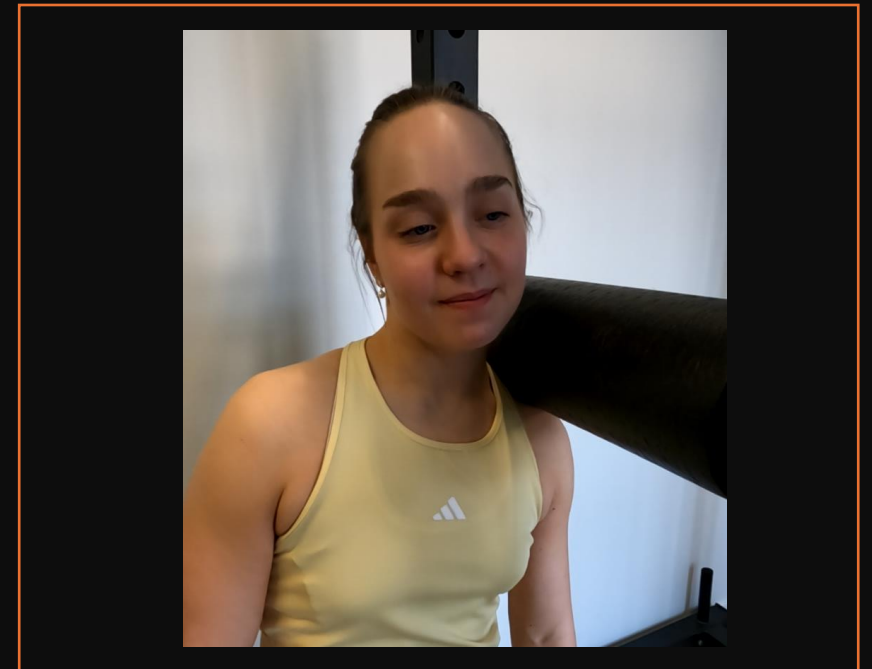

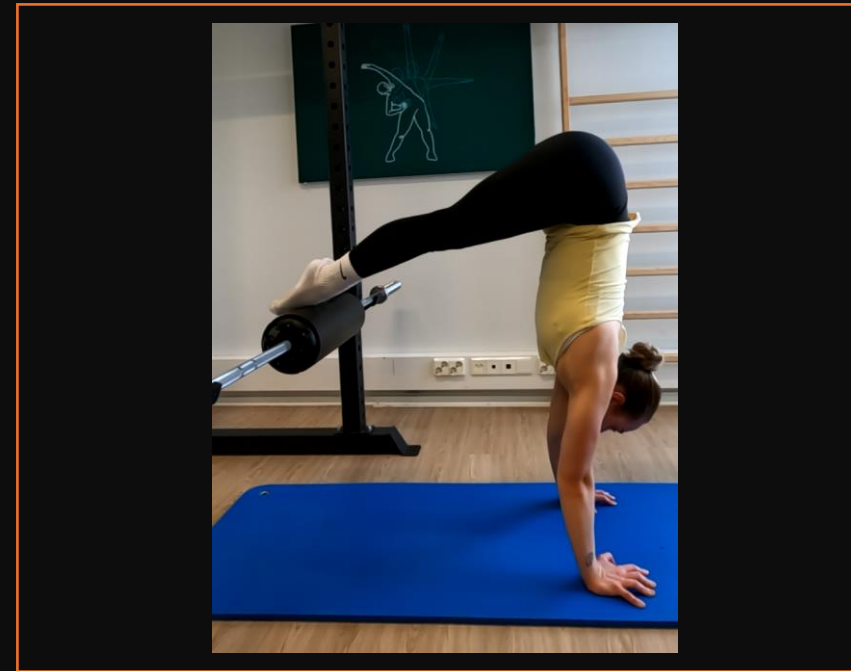

Versatile workouts

1. Gym/Strength exercises
2. Crossfit
3. Foamrolling / Stretching
4. Pilates
5. Physiotherapy
